

## CUSTOMER & SUPPLIER DATA TRANSMITTAL (CSDT)

*Securely Streamline the Requirements Management Process*

### INDUSTRY LEADING CDRL-SDRL MANAGEMENT

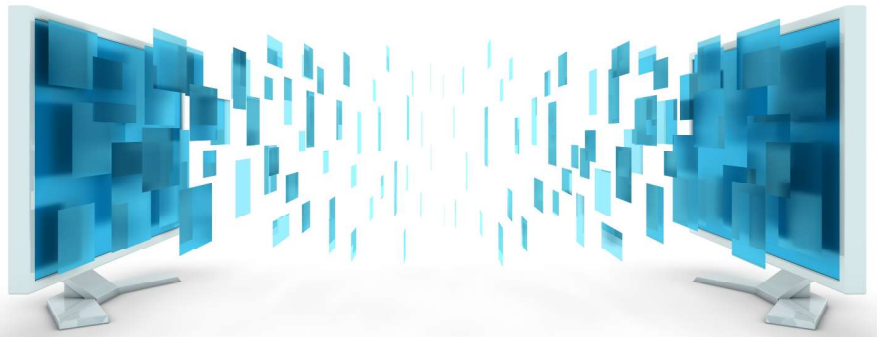

The Aerospace and Defense contracting environment is complex. There are numerous government, regulatory agency or customer contractual obligations that must be managed across OEMs and their supply chain partners. Consistency is required across the process to ensure efficient business operations as well as meet data exchange compliance standards. A comprehensive business process and enabling technology are essential for success.

### CSDT AEROSPACE CONTRACT DATA EXCHANGE

The Customer & Supplier Data Transmittal (CSDT) application automates the submittal contract process for CDRL (Contract Data Requirements List) and SDRL (Supplier Data Requirements List) while reducing errors cost and cycle time. The application strengthens supply chain for government agencies, contractors, suppliers and supports data chain of custody.

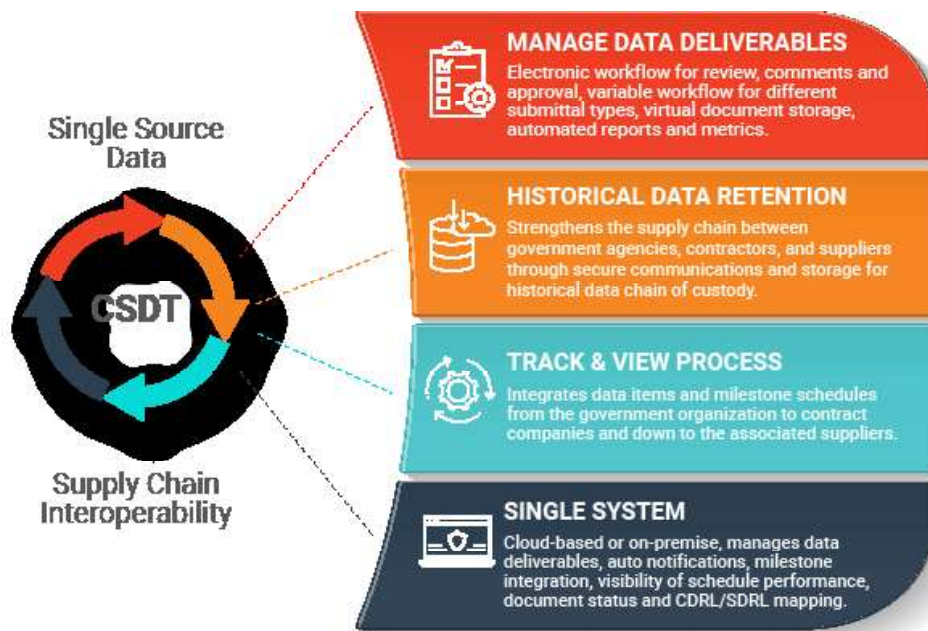

*CSDT integrates with PLM, ERP, and MRM systems allowing your business to streamline the complex and often changing supplier data and contract data requirements delivery process.*

## STREAMLINING THE INFORMATION EXCHANGE PROCESS

The CSDT system provides off-the-shelf, web-based software that streamlines the process of securely exchanging information between government organizations, contractors, and their suppliers.

CSDT has an easy-to-use interface and common workflow engine that reduces CDRL and SDRL document review and management costs. Its highly extensible architecture allows for custom configurations to meet your business process needs.

CSDT facilitates the exchange of aerospace contract and supplier data deliverables, tracks submission, disposition, review, approval, and change control, enabling businesses to manage the CDRL and SDRL delivery process efficiently.

This industry-leading solution provides visibility of schedule performance, document status, process health, and submittal information utilized in government, customer and supplier requirements processes for CDRL and SDRL management.
