

CSDT - Customer & Supplier Data Transmittal

Secure Data Exchange & Delivery Management

SECURE COLLABORATION & COMPLIANCE

Customer & Supplier Data Transmittal (CSDT) is an off-the-shelf, web-based software designed to revolutionize the way information is exchanged between government organizations, contractors, and their suppliers. By offering a secure platform for managing data requirements and documents, CSDT ensures that only authorized parties have access to sensitive information, facilitating a seamless and secure exchange process. CSDT also fulfills the requirement of consistency across the process to ensure efficient business operations as well as meets data exchange compliance standards.

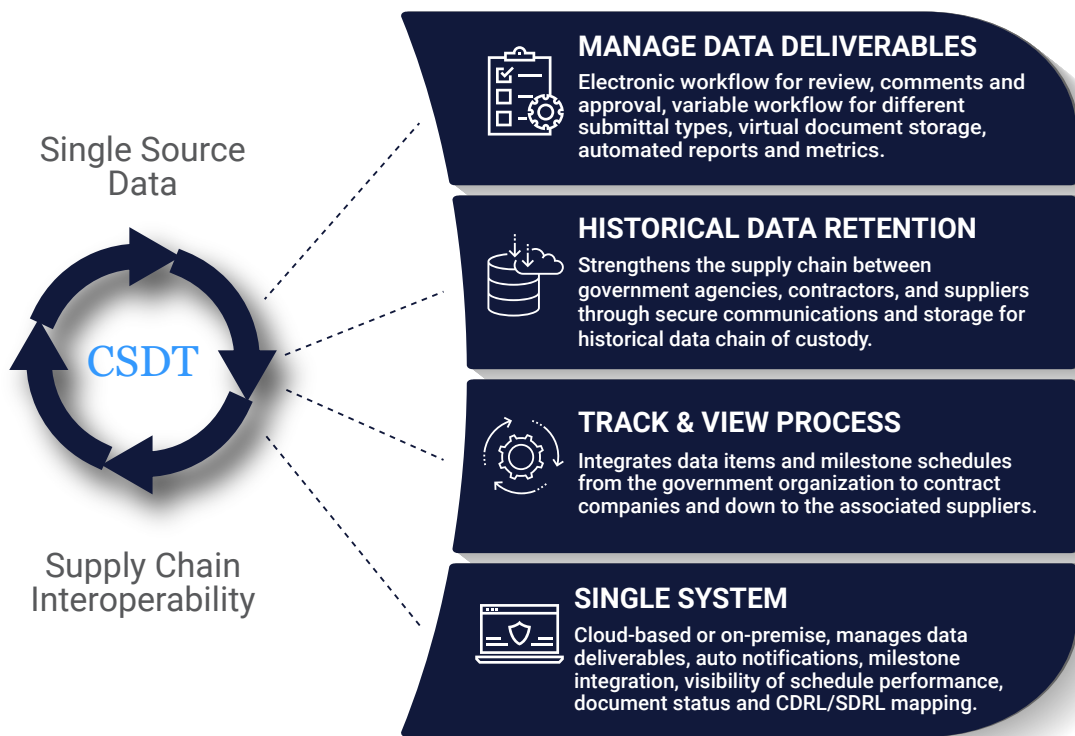

Customer & Supplier Data Transmittal
Streamlining the exchange of information.

CSDT integrates with PLM, ERP, and MOM systems allowing your business to streamline the complex and often changing supplier data and contract data requirements delivery process.

STREAMLINING THE INFORMATION EXCHANGE PROCESS

CSDT has an easy-to-use interface and common workflow engine that reduces CDRL and SDRL document review and management costs. Its highly extensible architecture allows for custom configurations to meet your business process needs. CSDT facilitates the exchange of aerospace contract and supplier data deliverables, tracks submission, disposition, review, approval, and change control, enabling businesses to manage the CDRL and SDRL delivery process efficiently.

This industry-leading solution provides visibility of schedule performance, document status, process health, and submittal information utilized in government, customer and supplier requirements processes for CDRL and SDRL management.

LET'S GET STARTED
