SCD - Supplier Capabilities Directory

Connecting the Aerospace, Defense, Naval & Maritime, and Manufacturing Marketplace.

TRANSFORMING YOUR SUPPLY CHAIN THROUGH BUSINESS CONNECTIONS

The aerospace, defense, naval & maritime, and manufacturing sectors are complex and ever-changing with new innovations, services, and products. The evolving industry landscapes pose a significant challenge in staying abreast of the multitude of companies and the value they bring to the marketplace.

The Supplier Capabilities Directory (SCD) is designed to network OEMs and their supply chain through an online community based on capabilities and business value. The supplier directory goes beyond providing basic company profile information. The targeted services and dynamic search feature set offer a robust and efficient mechanism to obtain criteria-based results that match your business needs quickly.

Supplier Capabilities Directory
Transforming your supply chain through business connections.

WORKING TOGETHER

Regardless of size, companies are seeking to gain market share and improve visibility. The Supplier Capabilities Directory provides a global reach to expand industry presence and helps organize information.

Global Reach

Helping suppliers, partners, agencies, and consortia expand their industry presence in the global aerospace, defense, and manufacturing industries.

Organize Information

Helps organize information for OEMs and suppliers through capability analysis, criteria matching, and industry designations.

SUPPLY CHAIN OPTIMIZATION EXPERTISE

Building an optimized supply chain sometimes requires outside expertise.

1 Our Consulting and Advisory services can help establish an effective market presence and enhance your company profile.

2 Our experts can help guide you to opportunities or provide strategic insight for new business acquisitions.

3 Our goal is to foster international connections across aerospace, defense, naval & maritime, and manufacturing.

SUPPLIER CAPABILITIES DIRECTORY

The Supplier Capabilities Directory is a free online service which provides an opportunity for suppliers and innovators to showcase their capabilities, products, and services through an editable company profile. OEMs and Tier 1's have robust search and filtering functions that allow visibility to find the right supplier based on any criteria.

The structured Capability Questionnaire organizes industry standard capabilities into logical groups. These groups include:

- Primary Business Industry
- Primary Business Model
- Approved Certifications
- Size Classification
- Diversity Classification
- Small Business Classification
- Aerospace specific capability categories

A leading supplier directory system giving visibility to innovative companies looking to connect with global aerospace, defense, naval & maritime, and manufacturing companies.

SCD ROLES

The Supplier Capabilities Directory provides role-based system access that displays relevant data to OEMs or suppliers to improve data access and visibility. Customers can filter on capabilities and get best-match graded results. Suppliers can view summary listings to evaluate their market presence and offerings and get online reports of companies viewing their profiles.
